*Soaking Depth includes the use of a Laurel Mountain Deeper Soak Drain & Overflow adding almost **2 INCHES!**

Laurel Mountain Deeper Soak Drain & Overflow

Our Deeper Soak cable operated drains are designed to provide almost two inches of additional soaking depth for your tub. The Immerse Insert enables the drain to handle overflow water from the top of the overflow/control knob versus the bottom which is the traditional method. Cable operated drains are the most reliable drains in the industry. Our drains are IAPMO (UPC) approved and are available in white, chrome, brushed nickel, bronze, biscuit, linen, and almond.
